June 2007

CEDIA Expo 2008, Stand A12/A14

Product collaborations expand Unique offering

Unique Automation is delighted to announce two exciting collaborations, with RAKO Controls Ltd and with Amina Technologies Ltd.

From July 2008 RAKO 7 button wall plates will be available with bathomatic functionality enabling remote running of presets 1 to 4 on as many as 256 bathomatic systems. It will also be possible to control any RAKO installations from our control panels.

Amina's innovative 'plaster in wall' speakers provide the perfect sonic accompaniment to our minimalist bathovision TV while reducing aesthetic impact.

Keen to work with others, Unique Automation has used the networking opportunities provided by CEDIA in building mutually beneficial relationships with both compaies.

MD of Unique Automation, Fredy Vasilev, comments: "A great deal of time has been spent on ensuring Unique Automation's products can be used both standalone and fully integrated into an automated home. Along with our dedicated control panels we also provide RS232, telnet and web based interfaces. These new collaborations demonstrate how versatile our products can be and their ability to expand the horizons of home automation yet further."
