

LUXURY CAN BE GREEN

The world's first luxury bathroom automation company, Unique Automation, is proud to announce the approval of its advanced bath management system bathomatic¹ by the [Carbon Trust](#). The Carbon Trust provides specialist support to business and the public sector to help cut carbon emissions, save energy and commercialise low carbon technologies.

The UK is committed to a 20% reduction in CO2 emissions by 2020 compared to 1990 levels and the Carbon Trust has been set up to help organisations reduce carbon emissions and cut costs, offering advice and financial support. 0% business loans of £3,000 - £100,000 are available from the Carbon Trust to help organisations finance and invest in energy saving projects and now bathomatic is amongst the approved products and Unique Automation the approved suppliers.

Why does a 0% business loan makes business sense:

- You can borrow between £3,000 and £100,000 interest free
- Anticipated energy savings offset the loan repayments so new equipment should pay for itself and you continue to make savings year on year
- The loans are government funded and unsecured
- A straightforward and fast application process with no arrangement fees²
- You'll receive a conditional offer within 48 hours of your application being processed
- Loans can be repaid over a period of up to 4 years
- You can track the progress of your application online

This approval would mean that hotel owners for example can invest through bathomatic in a reduction in CO2 emissions without the initial high cost.
